COMPANY

New head of product management sensors

Turck reassigned overall responsibility for product management sensor technology to Oliver Marks

Muelheim, July 7, 2009 – Turck reassigned the overall responsibility for its product management sensor technology to Oliver Marks effective July 1st. The 39-year-old has been responsible for Turck's product management position and proximity sensors since 1999. Marks succeeds Alfred Hack, who – after 15 successful years with Turck – assumes a leading position with another company. While Marks temporarily remains responsible for linear displacement, inclination and rotary position sensors, Sander Makkinga will be responsible for all inductive and magnetic-field sensors (including the uprox-family) effective July 1st.
